EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance:

The present application relates to providing a method of transmitting data on multiple carriers to an OFDM receiver and estimating modulation OFDM symbols at the OFDM receiver, including the unique method steps of "determining, from receiver sampling frequency, an analysis window with a block of samples, and estimating transmitted modulation signals by demodulating sub-carriers for said block of samples, wherein said estimation comprising correcting the changes in the position of an analysis window with respect to transmitted signal

without slaving receiver sampling frequency,” and “correcting the changes in the position of the analysis window consisting of estimating the phase difference between two consecutive symbols.” The closest prior art, Yoshikazu et al. (EP 0836304 A2), discloses an OFDM receiver in which the method of estimating transmitted modulation signals is performed by continuously using a feedback loop to change the receiver sampling frequency until the receiver sampling frequency deviation error is reduced to zero. However, Yoshikazu fails to anticipate or render obvious the above quoted limitations of the present application. This renders it allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
